

## Mud Muncher

### Reduces sludge and mud build up

EcoPond Mud Muncher is an environmentally friendly solution to the problems of sludge & mud build up in ponds. The formula is based on a blend of special bacteria called facultative anaerobes, which are proven to reduce the levels of mud and sludge on the pond bottom and in filters without harming the fish, wildlife or plants within the pond.

### Benefits of Mud Muncher:

- Fast acting bacteria remove dead algae & organic matter
- Helps eliminate stagnant odours
- Helps to reduce the need to clean ponds and filters
- Clean, simple and easy to use.
- Cannot be overdosed
- Safe for fish, plants, humans, pets and wildlife.
- Can help to reduce algae re-growth when used in conjunction with Extract of Barley Straw.

**Dosage:** 50 mls per 4,500 litres (1000 gallons) per week in autumn  
20 mls per 4,500 litres (1000 gallons) every 2 weeks in spring/summer

EcoPond Mud Muncher is formulated from specially blended bacteria and contains no herbicides or pesticides.

### Additional information:

- Natural products sometimes work less quickly than available chemical products but offer a safer solution.
- UV can affect the activity of this product. It is important to dose more regularly (twice a week) if the system contains UV.

**See reverse of sheet for answers to Frequently Asked Questions about EcoPond Mud Muncher.**

## Frequently Asked Questions:

### ***What is Ecopond Mud Muncher?***

Mud Muncher is a blend of specially formulated, natural pond bacteria.

### ***What does Mud Muncher do?***

Mud Muncher helps to break down the mud and sludge at the bottom of a pond.

### ***How do I use it?***

We recommend dosing 20 mls per 4,500 (1000 gallons) of pond water fortnightly throughout the summer months and 50 mls per 4,500 (1000 gallons) per week between September and November.

Please note that, the above dosages are given as a guideline, as all ponds are different and respond differently to treatment. As Mud Muncher is a totally natural product, it can take a while to be fully effective.

### ***What are the benefits of using Mud Muncher?***

Its regular use will help with the removal and breakdown of sludge and mud at the bottom of a pond, helping to maintain good water quality and healthy fish. It can also reduce the need to clean the pond out during spring.

### ***Is there anything that stops Mud Muncher from working?***

Mud Muncher contains live bacteria, which can be affected by medication, so if medicating your fish regularly, it is wise to consider adding Mud Muncher more regularly as well.

### ***Is there a situation where it cannot be used?***

No, it is safe to use in even the most sensitive environments.

### ***How much do I need?***

One 250 ml bottle will treat up to 4,500 litres (1000 gallons) of pond water.

### ***How do I dose it into my pond?***

It is best added into the pond filter or near to a re-circulating system or pump to ensure it is well mixed, but otherwise, it can simply be sprinkled across the surface of the water. A dosage chamber on the 250 ml and 1 litre bottles makes it very easy to measure the dose required.

### ***What happens if I add too much?***

Don't worry. It is a totally natural product and no harm is done by adding too much.
